

Mishicot Club *Oct 1951* Launches Drive

MISHICOT—A determined membership drive, designed to provide additional revenue that will make possible the installation of more playground equipment at the local athletic and recreation park, has been launched by the Mishicot Sportsmen's Club.

The club is composed of forward looking Mishicot men who during the past two or three years provided the community with one of the finest small town athletic areas in this section of the state—Sportsmen's Park. The park has a new lighting system for both night football and baseball.

A letter being sent out to prospective members the Sportsmen's Club states:

"Neighbor, this is a personal invitation to join the Sportsmen's Club. . . This is not my club or anyone else's club in particular, but very definitely OUR club. . . . Do you realize that for one dollar you can become a member of the largest organization in town and you will have an interest in a project that is worth at least \$8,000?

"Playground equipment will soon be added to the park so that all the kiddies may spend more time there. . . It's much safer in the park than on the streets. . . The streets were used for playgrounds long enough and the children want something different. . . The children will be glad to tell their playmates that 'my daddy is a Sportsman and helped make this park a success.' . . . Dad, you may tell your friends that the park is yours, and hard work is what makes it look like it does today. . ."

The Sportsmen's Club holds meetings on the first Wednesday of each month in the Mishicot town hall. Membership blanks may be obtained from any of the officers—President Abe Theis, Vice President Bill Thielbar or Secretary Norman Burt.
